

Day 3: DNS Server Configuration Theory (30 min):How DNS resolves domain names to IPs. **Practical (30 min):**Configure a DNS server and test domain resolution **Task:** Document the configuration and troubleshooting steps.

Task 1.

Install and set up a DNS server on your local machine or a VM using BIND (Linux) or Simple DNS Plus (Windows), then create a new DNS zone for the domain musicmania.in.

Task 2.

Add an A record in your DNS server configuration to map www.musicmania.in to the IP 192.168.1.50. This will allow you to test the configuration if the server is running.

```
C:\Users\sketan>nslookup www.musicmania.in 192.168.56.1
Server: UnKnown
Address: 192.168.56.1

Name: www.musicmania.in
Address: 192.168.1.50
```

Task 3.

Simulate a typo by adding a CNAME record for play.musicmania.in that points to

```
C:\Users\sketan>nslookup play.musicmania.in 192.168.56.1
Server:   UnKnown
Address:  192.168.56.1

Name:     play.musicmania.in

C:\Users\sketan>nslookup play.musicmania.in 192.168.56.1
Server:   UnKnown
Address:  192.168.56.1

Name:     www.musicmania.in
Address:  192.168.1.50
Aliases:  play.musicmania.in
```

Task 4.

Your DNS server is not resolving the domain musicmania.in as expected. Document the step-by-step troubleshooting process you would follow, including checking configuration files, restarting the DNS service, and testing with nslookup or dig.

Hint: Include at least three different troubleshooting commands or checks in your documentation.

Problem: musicmania.in was not resolving.

Steps:

Verified that the DNS zone musicmania.in exists in Simple DNS Plus.

Checked that the A record www.musicmania.in points to 192.168.1.50.

Verified that the CNAME play.musicmania.in points to www.musicmania.in.

Saved the DNS configuration and restarted the DNS service.

Used:

ipconfig /all to verify network configuration.

nslookup www.musicmania.in 192.168.56.1 to verify the A record.

nslookup play.musicmania.in 192.168.56.1 to verify the CNAME record.

Confirmed that both names resolve correctly to 192.168.1.50.
